Grant Modernization

Grant High School Modernization a \$116.1 million investment in Northeast Portland.

Construction began June 2017

Construction complete Fall 2019

[Grant Modernization FAQs](#)

Architect:
mahlum

Contractor:
ANDERSEN/COLAS
CONSTRUCTION

Grant High School is one of 3 PPS high schools being modernized as part of an 8-year \$482 million school building improvement bond. Grant's modernization will completely reconfigure and update learning spaces with a focus on indoor environmental quality, sustainability and historic preservation. Learn more about Grant High School here. The planning for the modernization of Grant began in the fall of 2015 and construction is scheduled to begin in summer 2017 and last 2 years. Students are scheduled to returned to a Modernized Grant in the fall of 2019.

Get Involved

Beginning in the fall of 2015 through the spring of 2016 a series of Public Design Workshops took place providing the Grant community a voice in the master planning and schematic design processes. The Grant Design Advisory Group held regular meetings throughout this time to provide feedback for the modernization process. Meeting minutes and workshop details are provided below.
