School Improvements 2014

ARLETA K-8

Arleta School is now safer, dryer and better thanks to the voter-approved PPS School Building Improvement Bond.

Work included:

Complete roof replacement with seismic strengthening
Plywood roof diaphragm added to make the roof function as a single unit
New skylights and mechanical equipment added

Building level seismic strengthening

Science classroom improvements - new overhead electrical outlets, accessible sinks, eyewash stations, and cabinets

Arleta K-8 is one of twelve schools that were successfully upgraded this summer. All the work was completed on time and on budget. During the 8 years of the Bond program, Portland Public Schools will upgrade up to 63 schools.

BUILDING OUR FUTURE TOGETHER.
