No More than 80 (7B)

There are _____ _____ in my pattern block creation.

number

hexagons 

trapezoids 

rhombuses 

triangles 

_____ is the **equivalent** of _____  triangles.

A hexagon
A trapezoid
A rhombus

number

When I add up all of the triangles in each of the shapes in my pattern block creation I get the number _____.

The area of my pattern block creation is _____.

Halves & Half-Nots (7C)

The **area** of the gray **region** is _____.

The **area** of the white **region** is _____.

Halves & Half-Nots (7C)

The **area** of the gray **region** is _____.

The **area** of the white **region** is _____.

Halves & Half-Nots (7C)

The **area** of the gray **region** is _____.

The **area** of the white **region** is _____.

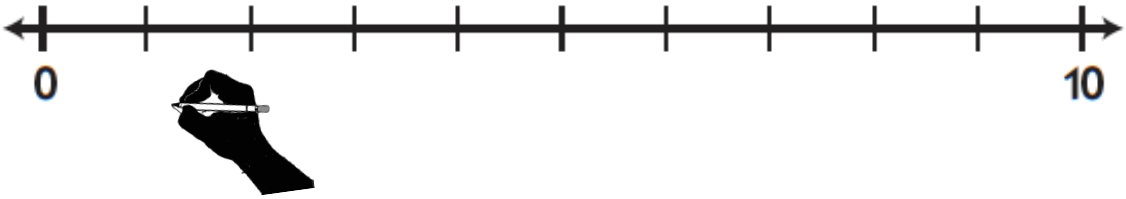
Halves & Half-Nots (7C)

The **area** of the gray **region** is _____.

The **area** of the white **region** is _____.

Number Line Race to 10 (7D)

First we label the marks on the number line.



Partner A Partner B

I will place my marker on _____.
number

I spun a _____ sign and the number _____.
+ plus
- minus

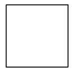
So I move my marker _____ hops _____.
number
forward →
backward ←

My number sentence is _____ _____ _____ equals _____.
number plus / minus number number

Now it is your turn!

Find the Area (7E)

The area of this shape is ______.



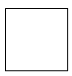
It has ______ squares __________ and _______ _____________.

(number) (preposition) (number) (preposition)

If you put the 2 triangles together, you get another square!

Find the Area (7E)

The area of this shape is ______.



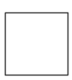
It has ______ squares __________ and _______ _____________.

(number) (preposition) (number) (preposition)

If you put the 2 triangles together, you get another square!

Find the Area (7E)

The area of this shape is ______.



It has ______ squares __________ and _______ _____________.

(number) (preposition) (number) (preposition)

If you put the 2 triangles together, you get another square!

Make the Area (7F)

The area of this shape is _____.

It has _____ squares _____ and _____ _____.
(number) (preposition) (number) (preposition)

If you put the 2 triangles together, you get another square!

Make the Area (7F)

The area of this shape is _____.

It has _____ squares _____ and _____ _____.
(number) (preposition) (number) (preposition)

If you put the 2 triangles together, you get another square!

Make the Area (7F)

The area of this shape is _____.

It has _____ squares _____ and _____ _____.
(number) (preposition) (number) (preposition)

If you put the 2 triangles together, you get another square!
