The title '4th Grade Support activities' is centered on the page. The word 'Support' is in a large, outlined font, and 'activities' is in a similar font below it. The number '4' in '4th' is a simple outline. To the left of 'Support' is a paper airplane. Above the 'o' in 'Support' is a coin with an eagle and the text 'UNITED STATES OF AMERICA' and 'ONE DOLLAR'. To the right of 'Support' is a rocket with a person climbing it. To the right of 'activities' is a train with the number '36' on its side and a '5' above it.

These support activities are designed for targeted groups of students who need additional practice with particular skills. These can be used on Tier 2/Differentiation Days, as an additional workplace, or as an "extra scoop" outside of the regular math class.

The blacklines for the activities are located on the protected side of the PPS Math web page. You will need to click on Number Corner Blacklines and open the section titled NC Support Blacklines. They are also included in the hard copy of the Number Corner Blacklines included with your kit, as well as on the disc.
