

Date:

Dear Family,

The TAG testing for _____ School will take place on _____ . Please make every effort to have your child at school on time that day.

Many students do not react well to hearing that they are going to take a TAG test. You know your child best, so tell him/her as little or as much as you believe they need to know. You may say that he/she is going to take part in tests that will help teachers to see how much their students know about certain subjects.

When the results come back, if your child does not qualify for TAG identification, you might tell him/her that we appreciated them taking part in the process. And remember, just the fact that they were asked to take part in these tests tells us that they are very bright students.

If you have any other questions, please contact me at

_____.

Thank you,
