NOTES

*Data is based upon ADM as of October 1 of the given school year.

*All data above excludes preK students from neighborhood areas so these students are not included in captured students

*In 2012-2014, PPS did include preK students in capture rates. It was later determined that this was not the best

approach and PPS changed its methodology for the 2015-16 school year as a result.

*School profile reports for the above mentioned years include preK students so capture rates will appear different in those

reports versus the report above.
