INTRODUCTION

Executive Summary

This report is a profile of current and historical enrollments for Portland Public Schools. Included herein are various summaries of these data, *e.g.*, by high school attendance area, building, grade level, gender and ethnicity. In recent years enrollment counts are compiled on or about the first of October. An enrolled student is defined as a student who attends one or more schools or programs within the District. Regardless of the number of schools or programs attended, each student is counted only once; the counts are unduplicated.

Following are brief highlights of the report.

- Overall enrollment is 54,150, a drop of 277 students from the previous year.
- Elementary school enrollment declined by 1.2 percent (295 students), while middle school enrollment increased by a similar margin (1.1 percent or 119 students). High school enrollment remained stable (up slightly by 0.3 percent or 39 students).
- Enrollment in Special Education Programs increased by 19 students (0.8%).
- Enrollment in community-based alternative programs is down 8.4 percent (119 students) from than the previous year.
- Enrollment in Public Charter programs increased by 84.8%, from 66 students in 2000-01 to 122 students in the 2001-02 school year.

On the next page is a table of the District enrollment summary for the last two years.

Portland Public Schools Enrollment Summary October 2000 Versus October 2001

	October 2000	October 2001	Change	
			Number	Percent

Summary	54,427	54,150	-277	-0.5

¹ The majority of PPS students in Special Education are reported above in 'PPS Schools and Programs'.

Explanations and Definitions of Computed Data

The Late Enrollee Ratio and Stability Index are indicators of student mobility within the District in a given instructional year. Used in conjunction with enrollment counts, these statistics provide a broader picture of the District's student population. For example, in schools with high Late Enrollee Ratios or low Stability Indices, enrollment counts during the school year may vary considerably from the October 1 counts.

Please note that methods for calculating both the Late Enrollee Ratio and the Stability Index were revised in 1997-98. Previous years' summaries were derived from aggregate data depicting how and from where students entered the District and why they left (*i.e.*, entry and leave codes). These data provided only a general indication of when students entered and/or left Portland Public Schools (PPS). Summaries contained in subsequent reports were derived directly from the District's student database and individual entry and leave dates. In all cases, comparisons of Stability Indices calculated using the current method are higher than those derived from the previous method. In contrast, similar comparisons of Late Enrollee Ratios are mixed. Extreme caution should be used when making comparisons of these data across years.

Late Enrollee Ratio

This is the percentage of students in a given school year who enrolled **after** October 1 compared to those who enrolled **by** October 1. The average Late Enrollee Ratio for the District in 2000-01 was 17.0% (this includes the District's alternative schools and programs); for elementary schools 12.3%; for middle schools 11.1%; and high schools 10.1%. The formula is A / B , where:

- A = the number of students enrolled **after** October 1
- B = the number of students enrolled **by** October 1

Stability Index

This is the percentage of students in a given school year enrolled at the same school October through June compared to October 1 enrollment. The average Stability Index for the District in 2000-01 was 85.5%; for elementary schools 88.7%; for middle schools 88.6%; and high schools 83.8%. (Again, the District Stability Index reported above includes the alternative schools and programs, in addition to the regular elementary, middle and high schools.) The formula used is A / B , where:

- A = number of students enrolled in the same school October through June
- B = the number of students enrolled **by** October 1

Following are tables and graphs summarizing enrollment in Portland Public Schools.

Neighborhood Area, also known as Attendance Area (AA), refers to the assigned geographic area surrounding the school from which most of the student enrollment is drawn. Only PPS regular elementary, middle and high school programs have assigned Attendance Areas. Benson High, PPS Alternative, Community-based Alternative and Special Education programs do not have an assigned geographic enrollment area; rather these programs draw students from the entire District.

Neighborhood Area, also known as Attendance Area (AA), refers to the assigned geographic area surrounding the school from which most of the student enrollment is drawn. Only PPS regular elementary, middle and high school programs have assigned Attendance Areas. Benson High, PPS Alternative, Community-based Alternative and Special Education programs do not have an assigned geographic enrollment area; rather these programs draw students from the entire District.
