## INTRODUCTION

### Executive Summary

This report is a profile of current and historical enrollments for Portland Public Schools. Included herein are various summaries of these data, *e.g.*, by high school attendance area, building, grade level, gender and ethnicity. In recent years enrollment counts are compiled on or about the first of October. An enrolled student is defined as a student who attends one or more schools or programs within the District. Regardless of the number of schools or programs attended, each student is counted only once; the counts are unduplicated.

Following are brief highlights of the report.

- District enrollment is 52,969, a drop of 1,181 students (2.2%) from the previous year.
- Elementary school enrollment declined by 3.9 percent (948 students). Middle and high school enrollments decreased by smaller margins (1.1% and 1.6%, respectively). Overall, enrollments in regular or traditional programs realized a decline of 2.7% (1,290 students).
- Enrollment in Special Education Programs declined by 160 students (6.9%).
- Enrollment in community-based programs grew by 6.5 percent (84 students) from than the previous year.
- Enrollment in Public Charter programs increased by 59.0%, from 122 students in 2001-02 to 194 students in the 2002-03 school year.

On the next page is a table of the District enrollment summary for the last two years.

## Explanations and Definitions of Computed Data

The Late Enrollee Ratio and Stability Index are indicators of student mobility within the District in a given instructional year. Used in conjunction with enrollment counts, these statistics provide a broader picture of the District's student population. For example, in schools with high Late Enrollee Ratios or low Stability Indices, enrollment counts during the school year may vary considerably from the October 1 counts.

### *Late Enrollee Ratio*

This is the percentage of students in a given school year who enrolled **after** October 1 compared to those who enrolled **by** October 1. The average Late Enrollee Ratio for the District in 2001-02 was 16.3% (this includes the District's education option schools and programs); for elementary schools 11.4%; for middle schools 10.3%; and high schools 8.9%. The formula is  $A / B$ , where:

- A = the number of students enrolled **after** October 1
- B = the number of students enrolled **by** October 1

### *Stability Index*

This is the percentage of students in a given school year enrolled at the same school October through June compared to October 1 enrollment. The average Stability Index for the District in 2001-02 was 86.2%; for elementary schools 88.6%; for middle schools 89.0%; and high schools 84.5%. (Again, the District Stability Index reported above includes the alternative schools and programs, in addition to the regular elementary, middle and high schools.) The formula used is  $A / B$ , where:

- A = number of students enrolled in the same school October through June
- B = the number of students enrolled **by** October 1

NOTES: Program type reflects most recent administrative assignment. In recent years enrollment counts are compiled on or about the first of October. An enrolled student is defined as a student who attends one or more schools or programs within the District. Regardless of the number of schools or programs attended, each student is counted only once; the counts are unduplicated.

Wilcox and Youngson Elementary Schools were closed at the end of the 2001-02 school year. Most students residing in the Wilcox neighborhood area now attend Vestal Elementary, while those residing in the Youngson neighborhood area attend Bridger Elementary.

Neighborhood Area, also known as Attendance Area (AA), refers to the assigned geographic area surrounding the school from which most of the student enrollment is drawn. Only PPS regular elementary, middle and high school programs have assigned Attendance Areas. Benson High, Magnet/Special Focus, Community-based Alternative and Special Education programs do not have an assigned geographic enrollment area; rather these programs draw students from the entire District.

Neighborhood Area, also known as Attendance Area (AA), refers to the assigned geographic area surrounding the school from which most of the student enrollment is drawn. Only PPS regular elementary, middle and high school programs have assigned Attendance Areas. Benson High, Magnet/Special Focus, Community-based Alternative and Special Education programs do not have an assigned geographic enrollment area; rather these programs draw students from the entire District.
