INTRODUCTION

Executive Summary

This report is a profile of current and historical enrollments for Portland Public Schools. Included herein are various summaries of these data, e.g., by high school attendance area, building, grade level, gender and ethnicity. In recent years enrollment counts are compiled on or about the first of October. An enrolled student is defined as a student who attends one or more schools or programs within the District. Regardless of the number of schools or programs attended, each student is counted only once; the counts are unduplicated.

Following are brief highlights of the report.

- Overall enrollment is 55,831, a drop of 752 students from the previous year.
- Special Education Programs gained 71 students.
- High school enrollment remains essentially unchanged (up 38 students). Middle school and elementary school enrollments were reduced by 4.2 percent (460 students) and 1.5 percent (378 students), respectively. The elementary school reduction seems largely a reduced enrollment in kindergarten programs (142 fewer kindergarten students versus 128 fewer students in grades 1 through 5).
- Enrollment in community-based alternative programs is 12.8 percent (193 students) higher than last year.

On the next page is a table of the District enrollment summary for the last two years.

Explanations and Definitions of Computed Data

The Late Enrollee Ratio and Stability Index are indicators of student mobility in the District within a given instructional year. Used in conjunction with enrollment counts, these statistics provide a broader picture of the District's student population. For example, in schools with high Late Enrollee Ratios or low Stability Indices, enrollment counts during the school year may vary considerably from the October 1 counts.

Please note that methods for calculating both the Late Enrollee Ratio and the Stability Index have been revised for the 1997-98 summaries. Previous years' summaries were derived from aggregate data depicting how and from where students entered the District and why they left (i.e., entry and leave codes). These data provided only a general indication of when students entered and/or left Portland Public Schools (PPS). Summaries of 1997-98 were derived directly from the District's student database and individual entry and leave dates. In all cases, comparisons of Stability Indices calculated using the current method are higher than those derived from the previous method. In contrast, similar comparisons of Late Enrollee Ratios are mixed. Extreme caution should be used when making comparisons of these data across years.

Late Enrollee Ratio

This is the percentage of students in a given school year who enrolled **after** October 1 compared to those who enrolled **by** October 1. The average Late Enrollee Ratio for the District in 1997-98 was 18.8% (this includes the District's alternative schools and programs); for elementary schools 13.8%; for middle schools 11.5%; and high schools 10.0%. The formula is A / B , where:

- A = the number of students enrolled **after** October 1
- B = the number of students enrolled **by** October 1

Stability Index

This is the percentage of students in a given school year enrolled at the same school October through June compared to October 1 enrollment. The average Stability Index for the District in 1997-98 was 83.3%; for elementary schools 87.2%; for middle schools 86.9%; and high schools 80.1%. (Again, the District Stability Index reported above includes the alternative schools and programs, in addition to the regular elementary, middle and high schools.) The formula used is A / B , where:

- A = number of students enrolled in the same school October through June
- B = the number of students enrolled **by** October 1
