Average Daily Membership (ADM) represents the average number of students enrolled during the school year. ADM is calculated by dividing the total student days of enrollment (includes both days present and absent) by the number of school days (session days).

Average Daily Attendance rate is calculated by dividing the total days of attendance (all days each student is present) by the total number of student days (session days) offered by each school to these students.

**NOTE:** The data above should not be used for State School Fund calculations as necessary weightings have not been applied.
