## Student Discipline Referrals, 2007-08

### Students and Total Incidents Referred as a Percentage of October 2007 Enrollment

#### By Discipline Action Type

ODE#	School	Type	Total Referrals		Expulsion		Suspension, Out of School		Suspension, In School		Removal, Per Special Education		October 2007 Enrollment
			#	%	#	%	#	%	#	%	#	%	

All percentages are of October Enrollment.

Students may incur more than one referral, i.e., in-school suspension, out-of-school suspension (exclusion from school for at least one but not more than 10 days), expulsion or removal. Counts of students referred are unduplicated within a school; each student is counted only once in the total, but may be counted in multiple categories, i.e., a student received two in-school suspensions and one out of school suspension will be counted once in the in-school suspension category and once in the out of school category.

Total Incidents are the total Incidents reported to the Oregon Department of Education, where the action was taken was a Expulsion, Suspension in school, Suspension out of school, or Removal. Each incident is counted once counted by the highest action reported. Students and incidents with Low level Interventions and Delayed Expulsions not shown.

**Caution should be exercised when comparing discipline data across schools and years.** Although District policies and regulations increase consistency in addressing and reporting student discipline incidents, corrective action is based on an understanding of the individual student and ultimately determined by the best professional judgment of the administrator.

Additionally, comparison with prior years is especially difficult as the discipline incidents reported to the ODE have changed.

<sup>1</sup> For most of the schools and programs reported here, October enrollments are representative of the total number of students served throughout the school year, and thus a reasonable basis for calculating suspension and expulsion rates. However, for Alliance HS, an alternative high school serving 16- to 21-year olds previously unsuccessful in traditional high school programs, the total number of students served during the school year may be as many as 2 to 3 times greater than October enrollments. Consequently, suspension and expulsion rates reported for Alliance HS should be viewed with caution. Pioneer Programs, similarly take students throughout the school year, therefore October Enrollment is not a good representation of the total students served.
