

Portland Public School District 1st Reading

DATE: April 9, 2019

Public Comment for the following: Policy 8.70.044-P, Capital Asset Renewal Funds and Plans

The Portland Public School District is providing Notice of Proposed Policy Amendment to offer interested parties reasonable opportunity to submit data or comments on the proposed policies noted below.

Public comment may be submitted in writing directly to the district or through the district website noted below. Written comments must be submitted by 5:00pm on the Last Date for Comment listed below.

1st Reading by: Rita Moore, Chair

Portland Public School Board

Summary: Capital Asset Renewal Funds and Plans

Board of Education

Staff Analysis and Report to the Board

Board Work Session Date: 3/14/19

District Priority: 4

Board Meeting Date (if action item): 4/9/19

Executive Leadership Lead: Claire Hertz

Department: Facilities & Asset Management

Staff Lead: Dan Jung, Chief Operating Officer

SUBJECT: Capital Asset Renewal Funds and Plans 8.70.044-P

I. BACKGROUND

The Oregon Legislature passed Senate Bill 1036 in 2007 authorizing school districts to impose construction excise taxes. In 2008, the PPS Board approved to utilize the Construction Excise Tax (CET) fund for capital improvements for school facilities.

On average PPS receives \$6.5M per year in construction excise taxes; this amount varies depending on the scale of construction occurring in Portland. The district's CET fund (404) is currently allocated for unrestricted and restricted purposes as follows:

1. **Unrestricted:** This portion can be spent on capital improvements for all school facilities.
2. **Restricted:** In 2012, the PPS Board established a 20-year Capital Asset Renewal (CAR) Plan through Board resolution No. 4539. The restricted portion of the CET fund and the CAR fund are revenue sources for the CAR Plan to fund life cycle renewal of major building components the District has invested in recent years. The goal of this strategy was to extend the useful life of district facilities, ensure public capital investments are properly preserved and minimize deferred maintenance costs.

II. RELATED POLICIES/BEST PRACTICES

Board policy 8.70.044 Capital Asset Renewal Funds and Plans identifies the need for a CAR Plan. CET fund (404) and CAR fund (445) support CAR Plan eligible projects.

III. ANALYSIS OF SITUATION

The District's capital improvement needs far exceed available resources to meet those needs. A memo to the Board of Education from the then Interim Chief Operating Officer (dated January 24, 2017), estimated the total cost of repairs of only 11 identified scopes of work at approximately \$1.6 billion. See **Attachment A**. Far beyond the ability of the general fund and other available resources to rectify.

Restricting available capital funds to a select few buildings further exacerbates the need to resource deficient. Building systems in older schools require much more attention to keep operational, thus the District's capital improvement needs for buildings not eligible for the restricted CET or CAR funds far exceed the needs of those buildings that do qualify.

A presentation made to the Board of Education on April 10, 2018 illustrates the disparity between the CET revenue and CET applicable projects, estimating a shortage of revenue starting in approximately 2027, exceeding a negative deficient of \$10M by the end of 2029 and \$30M deficit by 2030. See **Attachment B, page 9**.

Amending the current policy to unrestrict the CET funds would help address deteriorating building systems in older facilities such as storm water drainage and paving repair at Rieke, foundation and floor settlement at Stephenson, bleacher repairs/replacements across the district, cafeteria floor replacement at Lane, and foundation repair and storm water mitigation at Gray. Among many other projects.

IV. FISCAL IMPACT

The amendments to the current policy would allow the district to use CET and CAR funds to address capital improvement issues in any improvement that meets the definition of "capital improvement" as outline in SB1036. This provides greater flexibility to address the needs of our aging systems and buildings that have not received any previous improvements, and help alleviate the general fund budget cuts proposed for FY2019/20.

Total funds to be un-restricted in Fiscal Year 2019-20 will provide approximately \$4.8M for additional work across the district in Fiscal Year 2019-20. Future year revenues of ~\$6.5M would also be available for needed upgrades and fixes across the district.

V. COMMUNITY ENGAGEMENT (IF APPLICABLE)

Community engagement has not occurred specific to this item.

VI. TIMELINE FOR IMPLEMENTATION/EVALUATION

Once the amendments to the policy are approved by the Board, we can move forward with additional projects anytime. The sooner the funds become available for use, the sooner projects can be completed.

VII. BOARD OPTIONS WITH ANALYSIS

The updated policy will remove the restriction that the building must have already been improved to be eligible for CAR Plan funding, originally outlined in resolution 4539. If this is not authorized, it leaves the buildings that do not meet the CAR Plan definition with un-addressed work. We have mechanical systems, structural work, emergency declarations and energy related improvements that are currently impacting the general fund or on hold due to the restriction on the Construction Excise Tax fund 404 and Capital Asset Renewal fund 445.

VIII. STAFF RECOMMENDATION

Staff recommends the board amend 8.70.044-P to remove the requirement that the District has already invested in the building or system in recent years in order to qualify for CAR Plan funding. Staff introduced the revised policy to the Policy and Governance Committee on March 14, 2019 where it was approved for a first reading at the next Board Meeting.

IX. I have reviewed this staff report and concur with the recommendation to the Board.

Guadalupe Guerrero
Superintendent
Portland Public Schools

RESOLUTION No. TBD

Unrestricting Capital Asset Renewal Plan

RECITALS

- A. Board Resolution 4539 (January 23, 2012) approved a Board of Education Policy 8.70.044 directing the establishment of a Capital Asset Review (CAR) fund, directing the use of revenues for the fund, and directing the development of a CAR Plan for the life-cycle renewal of major building components.
- B. Board Resolution 4539 specified the CAR Plan would provide for life-cycle renewal of major building components the District has invested in over the last several years including Rosa Parks and Forest Park as well as for any newly modernized or renovated building in the future.
- C. Board Resolution 4765 (June 3, 2013) modified the Board of Education Policy 8.70.044 to allow for excess in the CAR funds needed to fund the CAR Plan to be used for other District capital construction projects. Effectively creating a split between restricted and unrestricted CAR funds.
- D. District's current capital needs far exceed available resources to address the needs. Restricting capital funds to a select few schools further exacerbates the deficient between capital improvement needs and capital improvement resources available.
- E. The Superintendent recommends the Board authorize the amendment of Board of Education Policy 8.70.044 to allow CAR funds to be spent on any improvement as long as it meets the definition of "capital improvement" outlined in SB1036.

RESOLUTION

- 1. The Board amends Board of Education Policy 8.70.044 to allow the Superintendent or his designee to utilize the funds available in the CAR Plan to address any improvement that meets the definition of "capital improvement" as outline in SB1036.

BOARD POLICY

8.70.044-P

Capital Asset Renewal Funds and Plans

8.70.44 Capital Asset Renewal Funds and Plans

The Board of Education believes that all students deserve a quality learning environment. Consequently, the District should have a plan governing how all physical facilities that house and support the education programs of the District can be continuously maintained, regularly revitalized, and constructed using current best practices and methods that promote student learning. Such a plan should reflect actual funding capacity while supporting the goal of adequate funding to meet this policy goal.

~~The following policy provides the foundation for the implementation of a strategy designed~~ The District to should extend the useful life of District facilities, ensure public capital investments are properly preserved, and reduce deferred maintenance costs by:-

~~Therefore, it is Board Policy that:~~

- 1) ~~The Superintendent shall d~~ Developing a 20-year Capital Asset Renewal Plan (CAR Plan) for Board approval ~~in FY 11-12,~~ ^[EL1] with CAR Plan and funding updates at subsequent five-year intervals, ~~to provide for life-cycle renewal of major building components.~~ CAR Plan funds are available to address any improvement that meets the definition of "capital improvement" as defined in - SB1036ORS 320.183(3). ^{[JB2][EL3]} ~~the District has invested in over the last several years including Rosa Parks and Forest Park as well as for any newly modernized or renovated buildings in the future. Major building components include, but are not limited to, items like roof replacements, athletic field replacements, boiler upgrades, and major mechanical, electrical and plumbing upgrades.~~
- 2) The District shall establish funding for the Capital Asset Renewal (CAR) Plan that shall include, but not be limited to, the following components:
 - a. Fund 404: Construction Excise Tax (CET) Revenues (net of approved expenses and charges). ~~For FY11-12 through FY15-16, Fund 404 shall maintain a minimum annual set aside of \$1.5M for the CAR Plan. Fund 404 balances in excess of the minimum annual set aside for each respective year may be used to fund other district capital projects.~~
 - b. A new Capital Asset Renewal (CAR) Fund comprised of:-
 - i. ~~Subsequent to Following~~ debt ~~retirement~~ ~~estimated~~ ~~to~~ ~~begin~~ ~~in~~ ~~FY 2021/22~~, redirection of the Recovery Zone Bond debt service.
 - ii. Lease revenues and surplus property sales. At a minimum,

lease revenue shall be base-lined at the FY 2011/12 present day value to hold the General Fund stable.^[EL4]_[JB5]^[EL6]

BOARD POLICY

8.70.044-P

**Capital Asset Renewal
Funds and Plans**

- iii. Revenue generated from renting/leasing District athletic fields ~~will be. Revenue generated from renting/leasing athletic fields will be~~ tracked through the Civic Use of Buildings office.
 - c. Interest earned ~~by funds~~ in any of the above Funds.
- 3) Capital asset renewal projects identified in the CAR Plan and the use of funds from the CAR Fund and the CET Fund (Fund 404) will be proposed by the Superintendent in the District's annual budget process and are subject to annual Board of Education approval.

Board of Education Informational Report

MEMORANDUM

Date: January 24, 2017
To: Members of the Board of Education
From: Courtney Wilton, Interim Chief Operating Officer
Subject: Environmental Health and Safety Facility Improvements

This Memorandum provides a brief explanation of the process used by PPS staff to quantify the estimated cost of the district's most pressing environmental health and safety facility needs and also prioritize these needs for inclusion into a future general obligation bond request. For context, PPS has a large number of schools spread across Portland. This analysis includes ninety separate locations and approximately 10m square feet (See **Appendix A**). These locations included all existing schools except those that have or will be renovated by the 2012 bond (Franklin, Roosevelt, Grant and Faubion), those planned to be included for renovation in the 2017 bond request (Benson, Lincoln, Madison and Kellogg) and Blanchard administrative facility. It also included a number of leased or currently vacant sites which may in the future revert back to PPS operation. It should be noted the vast majority of these buildings are older with an average age of 76 years (See **Appendix B**). Maintenance of these facilities has been deferred to a large extent over many years and their overall condition is considered fair to poor. The vast majority of these structures were also constructed at a time when building standards were much less demanding than the current code. Total safety needs are very significant as a result.

Eleven separate health and safety areas were identified and considered highest risk based on an analysis factoring in estimated hazard severity, frequency and also feedback from the PPS board. The cost of fully mitigating this risk for all locations was then calculated using a variety of methods and information sources including estimates provided directly by professional consultants (lead in water and paint), prior comprehensive reviews (seismic, ADA, Roofing) and the PPS internal facility database. A professional cost estimator was also used to help update prior year costs, calculate contingencies, and estimate inflation. The total cost to mitigate all risks was then calculated and is estimated at approximately \$1.6 billion. See **Appendix C** for detail by area and overall total.

Once total needs were calculated staff went through a number of prioritization exercises to size the total requirements to available bond resources, estimated at \$100m, \$150m and \$200m, respectively. All of these safety needs are obviously very important and there exists no perfect way to prioritize. Methods used to prioritize included reducing need across the board, allocating resources based solely on risk, focusing dollars based on public awareness or by resulting operational savings, clustering improvements based on construction economies of scale or efficiencies, and finally prioritizing those improvements that are readily achievable and implemented in the near future. Ultimately what's being recommended by staff is a hybrid of these approaches, one that prioritizes several risk areas in their entirety (Radon and lead in water and paint), acknowledges the high risk posed by the district's current

fire life safety system, makes very meaningful progress in abating asbestos, devotes significant dollars towards pending roof replacement at twenty six buildings and at \$150m establishes a placeholder for ADA and school security improvements. At \$200m additional amounts are allocated for ADA and seismic improvements. No dollars were allocated towards stage safety and playground upgrades in any scenario; some, though not substantial, progress can be made on these fronts via grants and the district's annual capital budget. It's also important to note that the bond's modernization budget includes a very significant portion – in the range of 30% or around \$175m - of its budget devoted towards health and safety including sizable seismic and ADA components. These type improvements are also generally most efficiently made when part of a larger renovation – like a full scale modernization – vs. piecemeal. **Appendix D** details proposed safety allocations under the three scenarios.

We welcome questions and further review.

Remaining issuance authority	<hr/>
	443
Total available to finish program	\$737

- Beginning of eight year plan
- Not a cash problem

2012 BOND

Nearing completion - remaining projects:

- Finish Grant HS

- Maker Space at Roosevelt

Schools larger than original specifications

- Increased capacity

- More classrooms for full time classload

Roosevelt Maker Space added to project (\$5 million for space)

Currently forecast to cost \$0-\$10 million over funds
available from 2012 authority

MIDDLE SCHOOL IMPLEMENTATION/TRANSITION

REVISED UNFUNDED COSTS (millions)

Tubman	\$5.8
Roseway Heights	0.2
Rose City Park	1.9
Holladay/Youngson	0.7
Contingency	2.5
Design/soft costs to date	0.8
Total construction	<hr/> 11.9
Owner costs	1.4
	<hr/> 13.3
Fundable from bond Health & Safety	-1.9
Total unfunded costs	<hr/> \$11.4

*Does not include any costs of transitioning ACCESS

Management	40	40	40
TOTAL	790	926	879
Needed reconciliation		(136)	(89)

BUILDING PROCESS STATUS

KELLOGG

- Board approved master plan at original scope.
- Later analysis showed costs were much higher
- Internal group including educational leader reduced scope to get cost down
 - Some efficiencies
 - Smaller classrooms, no breakout rooms
 - Removed small fourth floor
- Must bring revised master plan back for board approval

MADISON

- Internal group met and reduced costs to "bare minimum" \$172 million
 - Removes all field improvements
 - Removes 4 classrooms, 2 labs, 4 collaboration spaces
 - Smaller classrooms, science labs
- Waiting for direction on budget. Will then submit master plan to Board
- Can meet Fall 21 opening date if decision made by mid-May and scope changes not too large

LINCOLN

- Internal group met and reduced costs to \$196 million
- Still working on reductions.
- Decision needed by mid-May

BENSON

- No group meeting as yet

OPTIONS

MIDDLE SCHOOL IMPLEMENTATION/TRANSITION

- Include all unfunded construction costs in bond funding.
- Charge non-bond funded items to construction excise tax
 - Barely fits – can handle about \$12 million
 - Allows \$3 million per year for rest of schools in addition to Health and Safety bond and \$1 million General Fund transfer
 - Requires postponing/repealing dedication to capital asset renewal
- Borrow money and repay from General Fund
 - Debt service about \$1 million per year on 15 year loan @4%.
 - Could declare intent to refund from next voter approval

2012 BOND

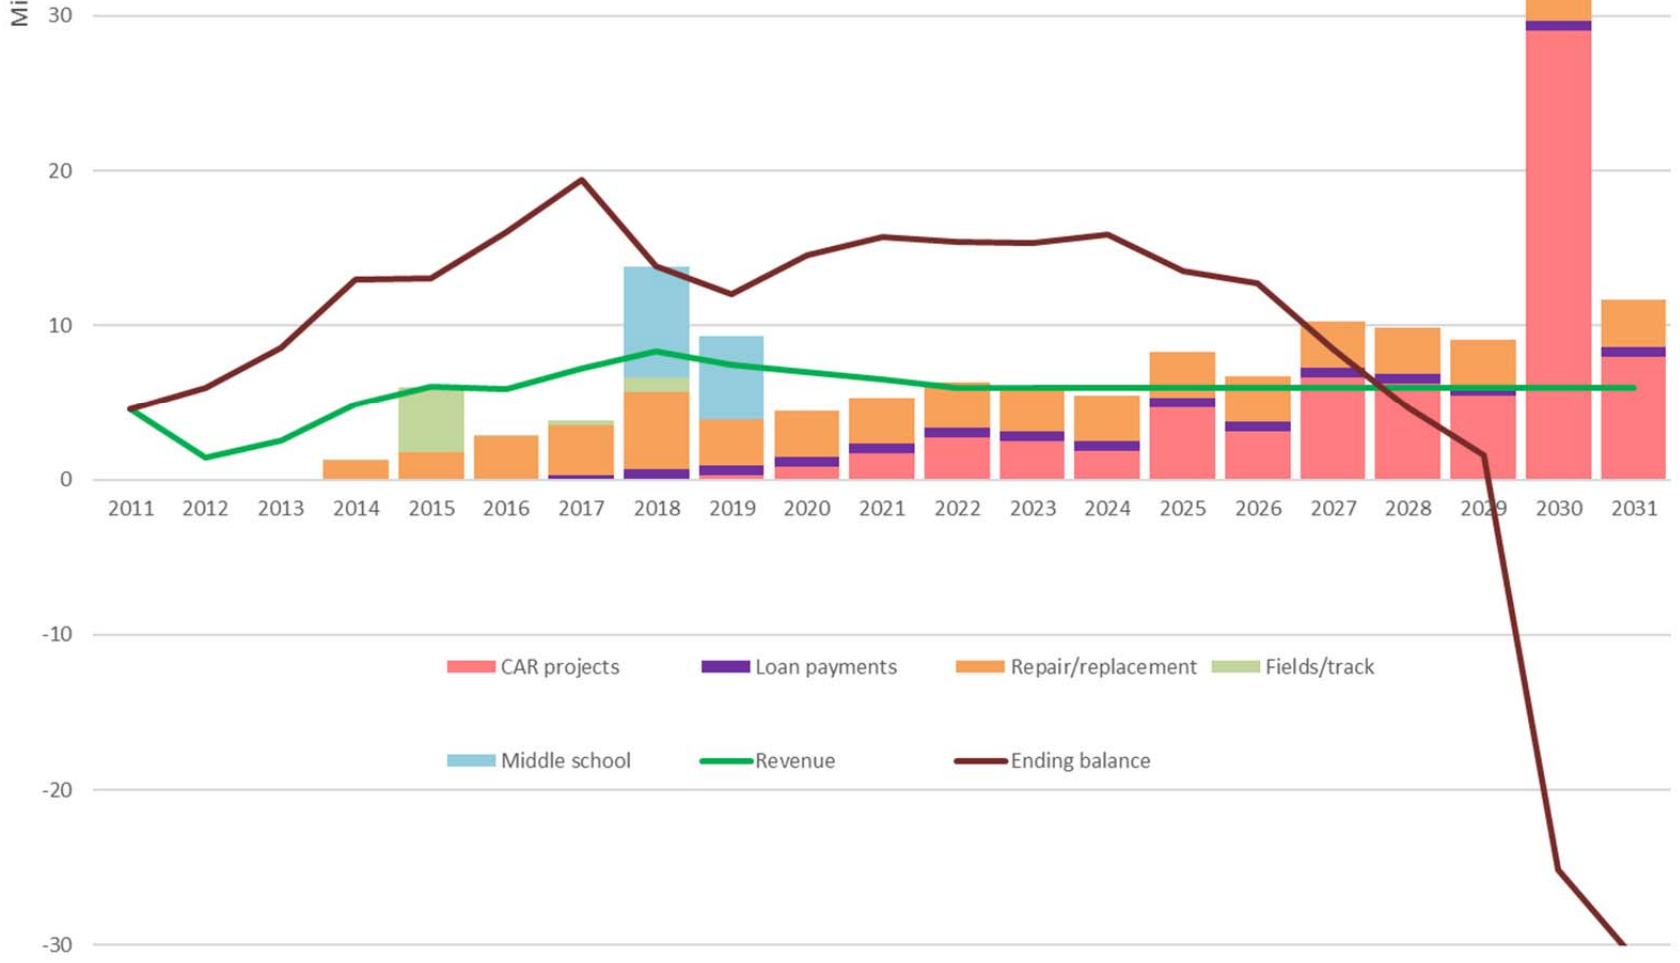

- Include all unfunded construction costs in bond funding.
- Charge non-bond funded items to construction excise tax
 - Probably won't fit if this solution used for middle school implementation
- Borrow money and repay from General Fund or CET
 - Could declare intent to refund from next voter approval

BOND OPTIONS

- Kellogg - consider revised master plan when it is ready
- High schools
 - Set timelines for high school building master plan approval
 - Continue the local process of analyzing/removing costs based on the timelines
 - Establish district reconciliation process to ensure equity across all high schools
 - Budget options
 - Go forward with reduced costs/scope
 - Do buildings in phases, fund second phase from next voter approval
 - Raise more money - some will come from structure of next bond issue and interest earnings
 - Borrow to complete projects, refund with next voter approval

CONSTRUCTION EXCISE TAX before \$11.4 million

Millions

CONSTRUCTION EXCISE TAX after \$11.4 million

Cost Estimates from Architectural Cost Consultants (ACC), Rider Levett Bucknall (RLB) and District Internal estimates.

Notes

1. CET: Construction Excise Tax. \$1.5M years 1-7. \$3M years 8-15. \$3.5M years 16-20.
2. Recovery Zone Bond: Energy (Utility Bill) Savings used to pay off Recovery Zone Bond debt redirected toward Capital Maintenance Program
3. Lease Revenue: Revenue used for Capital Maintenance from the lease of District property. At a minimum, lease revenue would be base-lined at the FY 11/12 present day value to hold the General Fund
4. Future Athletic Field Lease Revenue Beginning 2012
5. Estimated Revenue from the Sale of Washington Monros
6. Sum of CET Revenue + RZB + Interest Earned + Lease Revenue + Athletic Field Revenue + Surplus Sales
7. Internal Service Fund Balance = Total Revenue - Capital Expense
