Quick Facts Tracking Sheet	Name:

When you get back your Quick Facts Worksheet from last time:

- Record the date you completed the sheet, the time it took you, and the number of facts you got correct.
- If it took you more than 2 minutes or you got fewer than 38 facts correct, write "no" in the last box in the row and use that same multiplier or range of multipliers again.
- If you completed 38 or more facts correctly in 2 minutes or less, write "yes" in the last box in the row and choose another multiplier or range of multipliers.
- Cross out each number as you master the facts for that multiplier or range of multipliers. Then circle your next target.

2 10 3 4 5 6 2-6 7 8 9 4-9 11 12 6-12 0-12

Multiplier or range of multipliers	Date	Time	Number correct	Mastered at least 38 correct in 2 minutes or less

Multiplier or range of multipliers	Date	Time	Number correct	Mastered at least 38 correct in 2 minutes or less
