

3.30.080-P Resource Conservation

- (1) As a leader in the community, the district must take a key role in resource conservation and instilling a conservation ethic in today's youth. To accomplish this, the Board adopts the following resource conservation management strategies:
 - (a) Enhance awareness of resource conservation methods;
 - (b) Encourage the efficient use of electricity, natural gas, gasoline, water, full utilization of materials prior to disposal, limited use of disposable materials, non-biodegradable products and promote recycling efforts;
 - (c) Institute best practices for resource management;
 - (d) Maintain energy usage and energy costs at the lowest level that is reasonably achievable and consistent with an efficient learning environment in schools.
- (2) The Director of Facilities and Assets Management shall promulgate a resource management plan consistent with the district's educational goals incorporating these strategies and taking into consideration:
 - (a) New resource conservation technologies and alternative energy sources;
 - (b) Resource conservation in all building retrofits as well as in new buildings or additions;
 - (c) Best practices in resource conservation technology for monitoring and operating district buildings.
- (3) The plan shall also include procedures for the Director of Facilities and Assets Management to administer the plan to maintain resource conservation, efficient buildings and provide training and recognition for students, custodians, teachers, principals and others as appropriate to ensure conservation accountability. The effectiveness of the district's resource conservation plan will be continually revised as needed to reflect conservation innovations and shall include recognition for student and staff special efforts toward the goal of resource conservation.
