## Acceptable Internet Usage and Regulation Agreement

All students who use SEI computers must have on file an "Informed Consent and Release Form for Minor's Internet Access" signed by a parent or guardian if they wish to access the Internet. Please discuss the following user responsibilities with your child. Students who do not have a signed form on file will not be allowed to independently access the Internet.

The Computer Lab and Library computers have Internet access capability. We feel this is important to support and enhance learning and teaching for today's students. Users must be aware that there are services and materials available on the Internet that could be considered offensive and those individuals must take responsibility for their own actions in navigating the network. If there is a question about the appropriateness of an Internet resource for usage by grades 2 through 12, the student should check with the librarian, tutor, coordinator or other staff member.

Failure to fulfill responsibilities may result in the loss of network privileges or further disciplinary action. Following are guidelines for Internet usage:

- **Illegal or destructive activities:** Users will not attempt to gain unauthorized access. This includes attempting to log in through another person's account or access another person's files. Users will not make deliberate attempts to disrupt any computer system performance or destroy data.
- **Personal Safety:** Users will not post personal contact information about themselves or other people. Personal contact information includes but is not limited to address, telephone number, photographs, etc.
- **System Security:** Users are responsible for the use of their individual account and recognize that access is a revocable privilege. Under no conditions should a user provide his or her password to another person. Users must not possess or use software or hardware tools specifically designed to break security mechanisms.
- **Inappropriate Conduct:** As a member of the SEI family users are expected to know and abide by the SEI standards and rules in all activities including computer usage. Examples of inappropriate conduct include: impersonation or inappropriate anonymous activity; obscene, profane, lewd, vulgar, rude, inflammatory, threatening or disrespectful language; prejudicial or discriminatory attacks harassment; false or defamatory information about a person or organization.
- **Respect for Privacy:** Users will not resend a message that was sent to them privately without permission of the sender.
- **Respecting Resource Limits:** Users will use the network only for educational, professional, or career development activities, and limited, high-quality self-discovery activities. Games, puzzles, large program downloads, music videos, chain letters and "spamming" (annoying or unnecessary message sent to a large number of people) and other activities that are not directly linked to curriculum are not considered authorized use.
- **Plagiarism and Copyright Infringement:** Users will not plagiarize works they find on the Internet. Users will respect the rights of copyright owners.
- **Inappropriate Access to Material:** Users will not use the SEI network to access materials that are profane or obscene or that advocate illegal acts or that advocate violence or discrimination towards others.

A violation of the provisions stated in the Agreement may result in loss of Internet access and appropriate disciplinary action may be taken.

## **The Family Education Rights and Privacy Act**

The Family Educational Rights and Privacy Act (FERPA) (20 U.S.C. § 1232g; 34 CFR Part 99) is a Federal law that protects the privacy of student Education Records. FERPA gives parents certain rights with respect to their children's Education Records. These rights transfer to the student when he or she reaches the age of 18 or attends a school beyond the high school level. Students to whom the rights have transferred are "eligible students."

One of those rights is the right to consent to disclosures of personally identifiable and confidential information contained in the student's Education Records. Self Enhancement, Inc. (SEI) has found that to best serve students, it is necessary to access confidential information & data in a student's Education Record, such as grades, attendance record, test scores, Academic Priority Status, Behavior/Discipline Data & Information and whether a student is eligible to receive free or reduced lunch. In order for SEI to have access to this type of information, parents/guardians must agree, in writing, to the release and exchange of information to SEI from the district and between schools and outside entities.

SEI uses the information and data obtained from student's Education Records to identify and provide individualized education support services to students enrolled in the SEI Youth Services. SEI Staff who work directly with students may also verbally access and share information regarding a student's education and development for the purpose of coordinating support for individual students. Additionally, SEI is required to report on student success, measured by data contained in a student's education record to key funders. SEI only shares data/information from students' Education Records with funders and other outside entities in the aggregate. This means that information or data about an individual student is anonymously reported, as part of a collective summary-level analysis of an entire group of students. In the case that data is disaggregated, for the purpose of statistical analysis of specific subgroups of students (i.e. gender, race, or socio-economic status), information or compilations of data that would unnecessarily personally identify a specific student is removed or recoded to protect the privacy of individual students.

Since SEI is accountable to funders to prove student success, SEI is not able to receive funding without reporting. For this reason, if a parent/guardian does not agree to waive their FERPA rights by not agreeing to the exchange and release of information to SEI from the School district, school and other agencies, their child cannot enroll in SEI Youth Services or participate in program activities. Additionally, if a parent/guardian revokes their permission to share data and information, their child will not be able to continue receive services or participate in the SEI Youth Services.

## Client Consent to Release of Information for Data Sharing in Multnomah County

Northwest Social Service Connections' Homeless Management Information System / Client Management Information System (HMIS/CMIS) is a computer system that is used to collect and share information on homelessness and social services throughout Multnomah County. The information gathered by HMIS/CMIS allows agencies to plan and deliver services that help people in need. By sharing information with each other, agencies are able to simplify service delivery by coordinating services and referrals across agencies.

**Maintaining the privacy and safety of those using our services is very important to us.** The HMIS/CMIS runs in compliance with all Federal and State laws and codes, including Health Insurance Portability and Accountability Act (HIPAA). Every person and agency that is authorized to read or enter information into the database has been trained on client confidentiality policies and has signed an agreement to maintain the security and confidentiality of the information. Any person or agency that is found to violate their agreement may have their access rights ended and may be subject to further penalties.

Services will not be denied should you choose not to share information. - This authorization will remain in effect for 7 years unless I revoke it in writing by signing a written statement or Revocation form.
- I understand that I may cancel my consent to data sharing at any time. However, doing so will not change information that has already been given out or actions already taken. Revocation will be effective as of that date.
