

# Welcome to MyPPS!

MyPPS, powered by Classlink, is replacing Clever. PK-3 students will receive a Classlink Quickcard from their teacher to log into their PPS issued device and the MyPPS portal. The Quickcard functions like the former Clever QR badge. Please keep it secure. Students in grades 4-12 should type in their usernames and passwords to access their device and MyPPS. Students using a non-PPS device at home can go to [my.pps.net](http://my.pps.net) to log in.

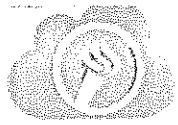

1. To log into a PPS issued device, open the device and power on. Then click the **NEXT** button. (Do not use SIGN IN WITH DIFFERENT ACCOUNT).
2. Next, students can log into their device by typing in their username and password or using their Quickcard.

3. Once logged in, your student's MyPPS portal should automatically launch. Applications will vary by student and grade level. If you are unable to log in or unable to locate an application assigned to your grade and student, please contact the OTIS service desk at 503-916-3375 or [support@pps.net](mailto:support@pps.net). You can also learn more about MyPPS and Classlink at:

# Welcome to MyPPS!

## Using a non-PPS issued iPad

1. Please make sure your iOS software is up to date. Please note that many applications require use of an iOS device to be running at a particular software update or higher. If you are having trouble getting a particular application to connect, you can search the device requirements for that application or contact the OTIS service desk at 503-916-3375 or [support@pps.net](mailto:support@pps.net) for guidance.
2. Open the Safari or Chrome web browser app on your iPad.
3. Go to [my.pps.net](http://my.pps.net) and log in with either your username and password or Quickcard. NOTE: If using a Quickcard, you may need to enable the camera settings on your iPad.
4. Once signed into MyPPS, you will see applications that are assigned to your account. If you are unable to log into MyPPS or unable to locate an application assigned to your grade and student, please contact the OTIS service desk at 503-916-3375 or [support@pps.net](mailto:support@pps.net).
5. Click on the icon to launch the application. If you are not connecting to the application, you may need to download the respective app from the App Store. Some resources PPS uses are web-based, not requiring an additional application, however many do require the vendor-specific app to be downloaded. These should all be downloadable at no cost. (Ex: Lexia Core 5) If you have downloaded the application in the past, be sure the application is up to date.
6. When clicking on an icon on the MyPPS page, you may receive the prompt to open the respective app- click Open to launch the application.
