AA6-3 Notes Finding An Exact Equation of a polynomial

What do you know about this polynomial?

x-intercept	type (multiplicity)	factor

Step 1: Write an equation for	
this polynomial with a lead	
coefficient "a".	
Step 2: Substitute the given	
point.	
Don't forget to replace every	
X.	
Step 3: Solve for "a".	
Should "a" be positive or	
negative?	
Step 4: Rewrite the equation	
with the value of "a".	

AA6-3 Notes Finding An Exact Equation of a polynomial

What do you know about this polynomial?

x-intercept	type (multiplicity)	factor	
			-3
			. ↓

Step 1: Write an equation for this polynomial with a lead coefficient "a".	
Step 2: Substitute the given point.	
Don't forget to replace every x.	
Step 3: Solve for "a".	
Should "a" be positive or negative?	
Step 4: Rewrite the equation with the value of "a".
