TOURS

- + Grant HS Modernization
- + Roosevelt HS Modernization
- + Franklin HS Modernization
- + CTEC, Salem
- + Portland State University

KEY FEEDBACK

- + Durability of finishes in all recent PPS projects a concern
- + Quantity of storage a general concern
- + Transparency at windows - careful consideration
- + How can Benson keep its character in the interiors and find that balance of 'glimpses into past'
- + Important to Benson community to stay connected to past

PROJECT OVERVIEW

Main Building construction, circa. 1916

STUDENT DESIGN CAPACITY

1,700	Benson Polytechnic HS
Approx. 100	Pioneer, PISA, Virtual Scholars
250 - 400	Alliance, DART/Clinton

PROPOSED BUILDING AREA

+/- 368,000 SF	Benson Polytechnic HS
42,000 - 75,000 SF	MPG Building

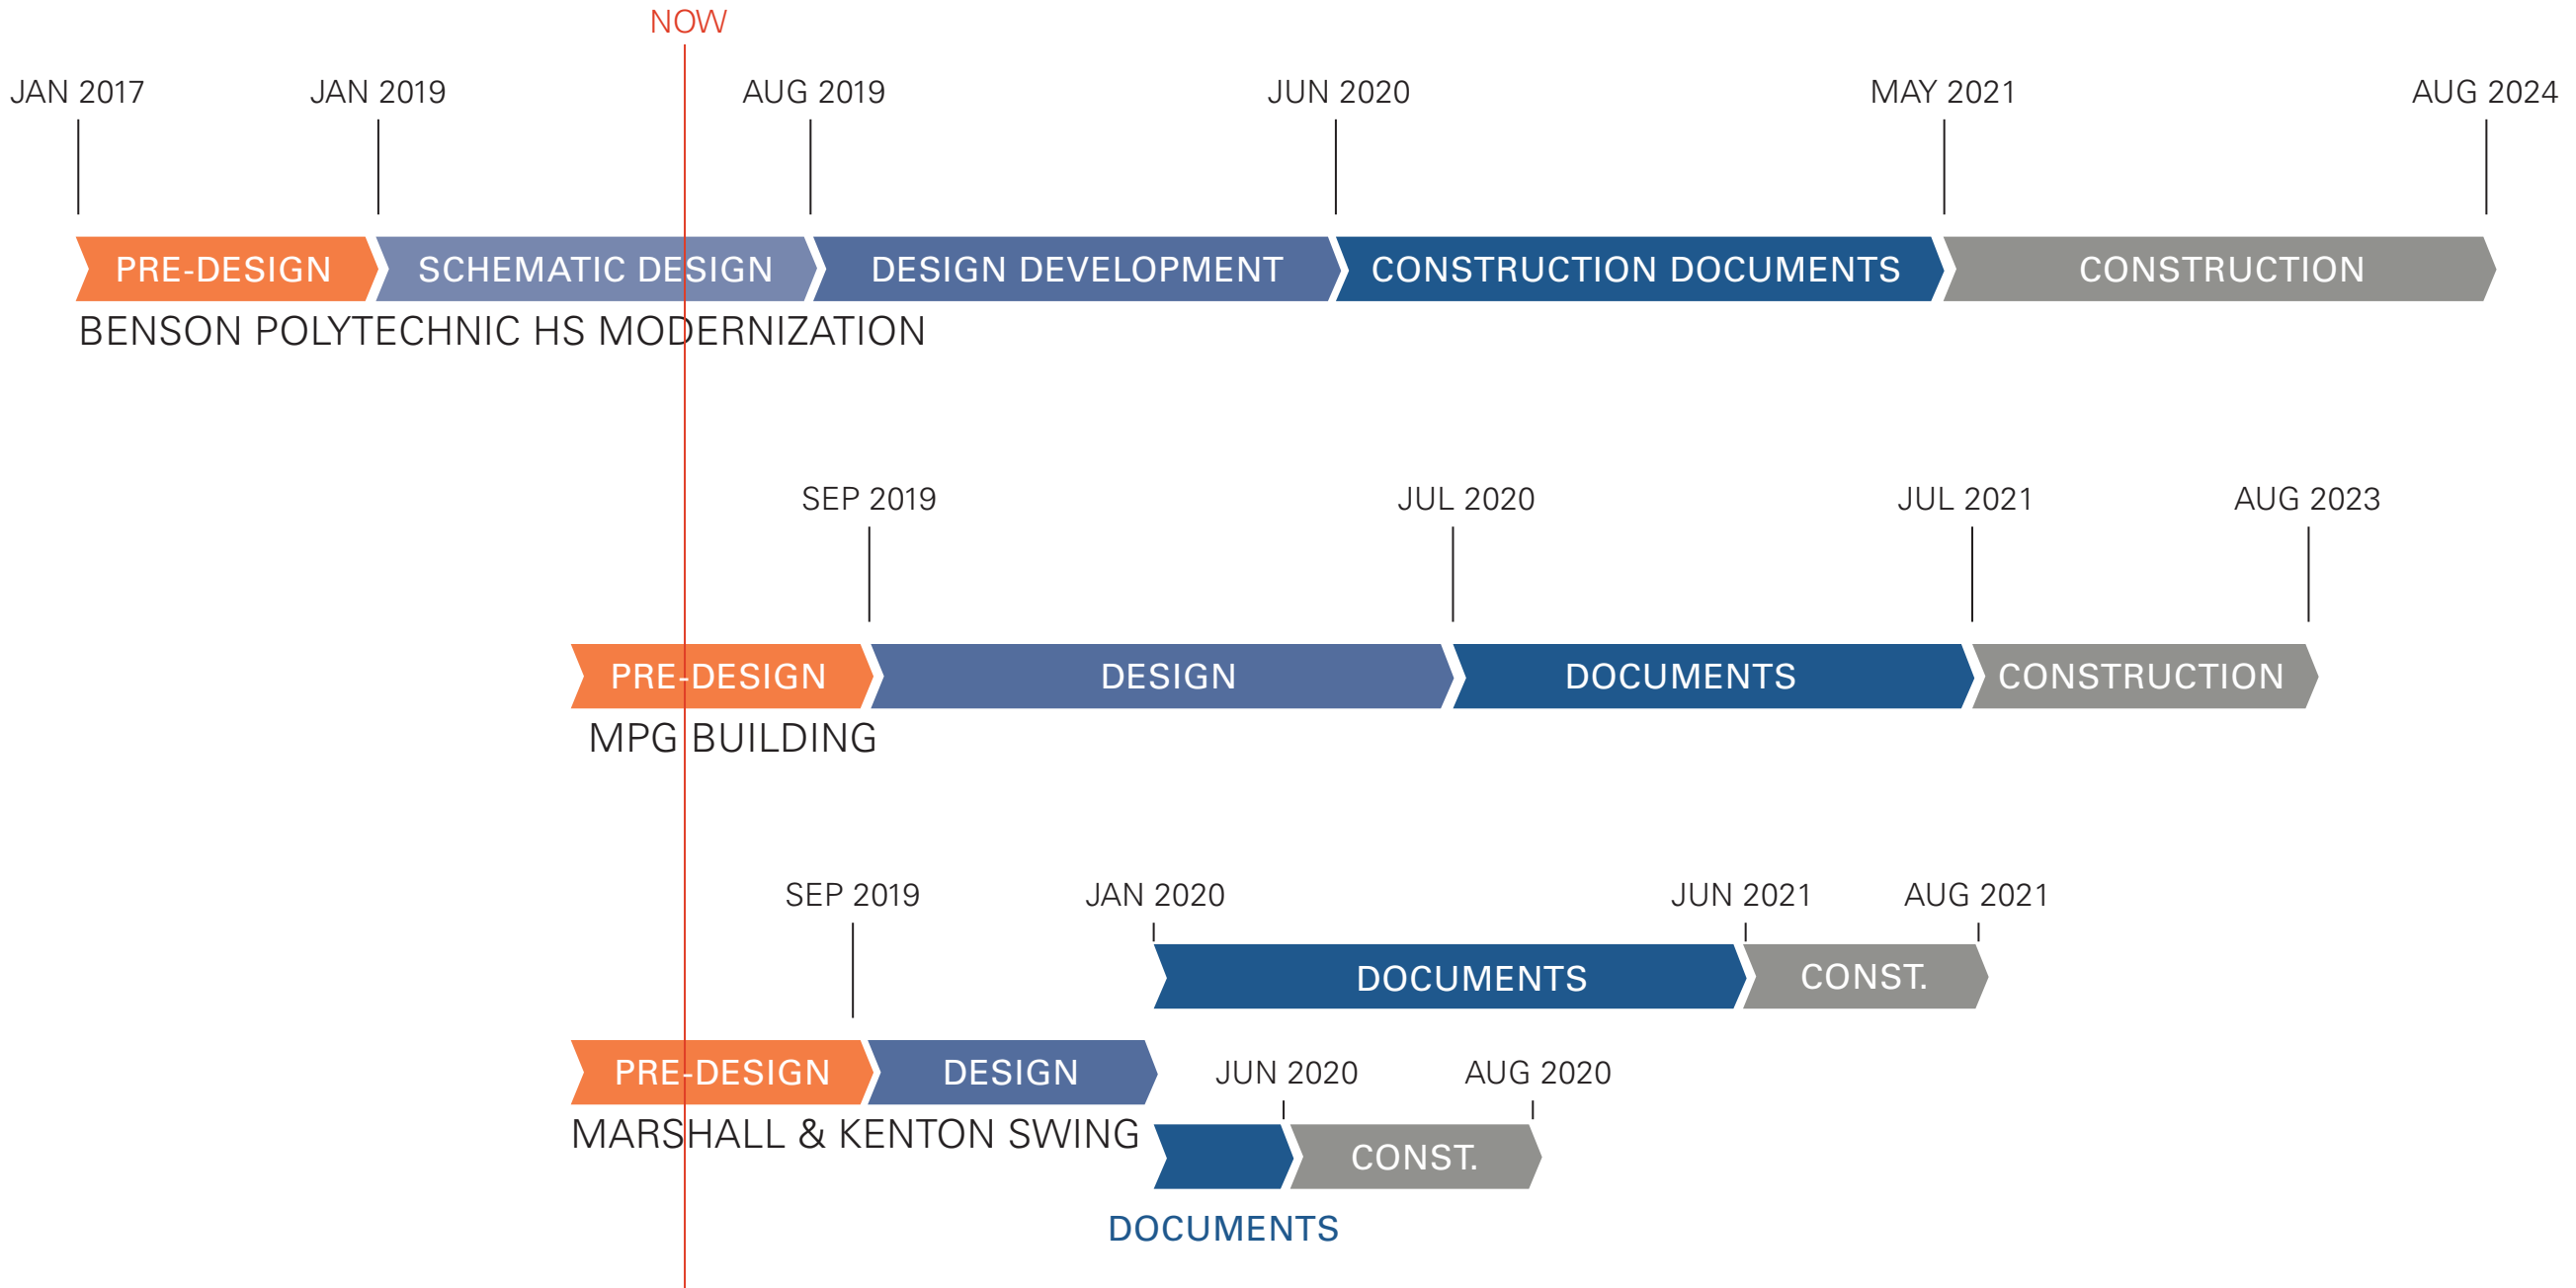

PROJECT BUDGET (RANGE)

\$330 - \$357 Million

KEY PROJECT CHALLENGES

- + Portland Landmark and NRHP eligible
- + Constrained urban site
- + Extensive health and safety upgrades required, including seismic upgrade of unreinforced masonry (URM) buildings and providing universal ADA access throughout campus
- + Multiple projects - Marshall and Kenton swing sites and MPG Building

PROCESS SCHEDULE

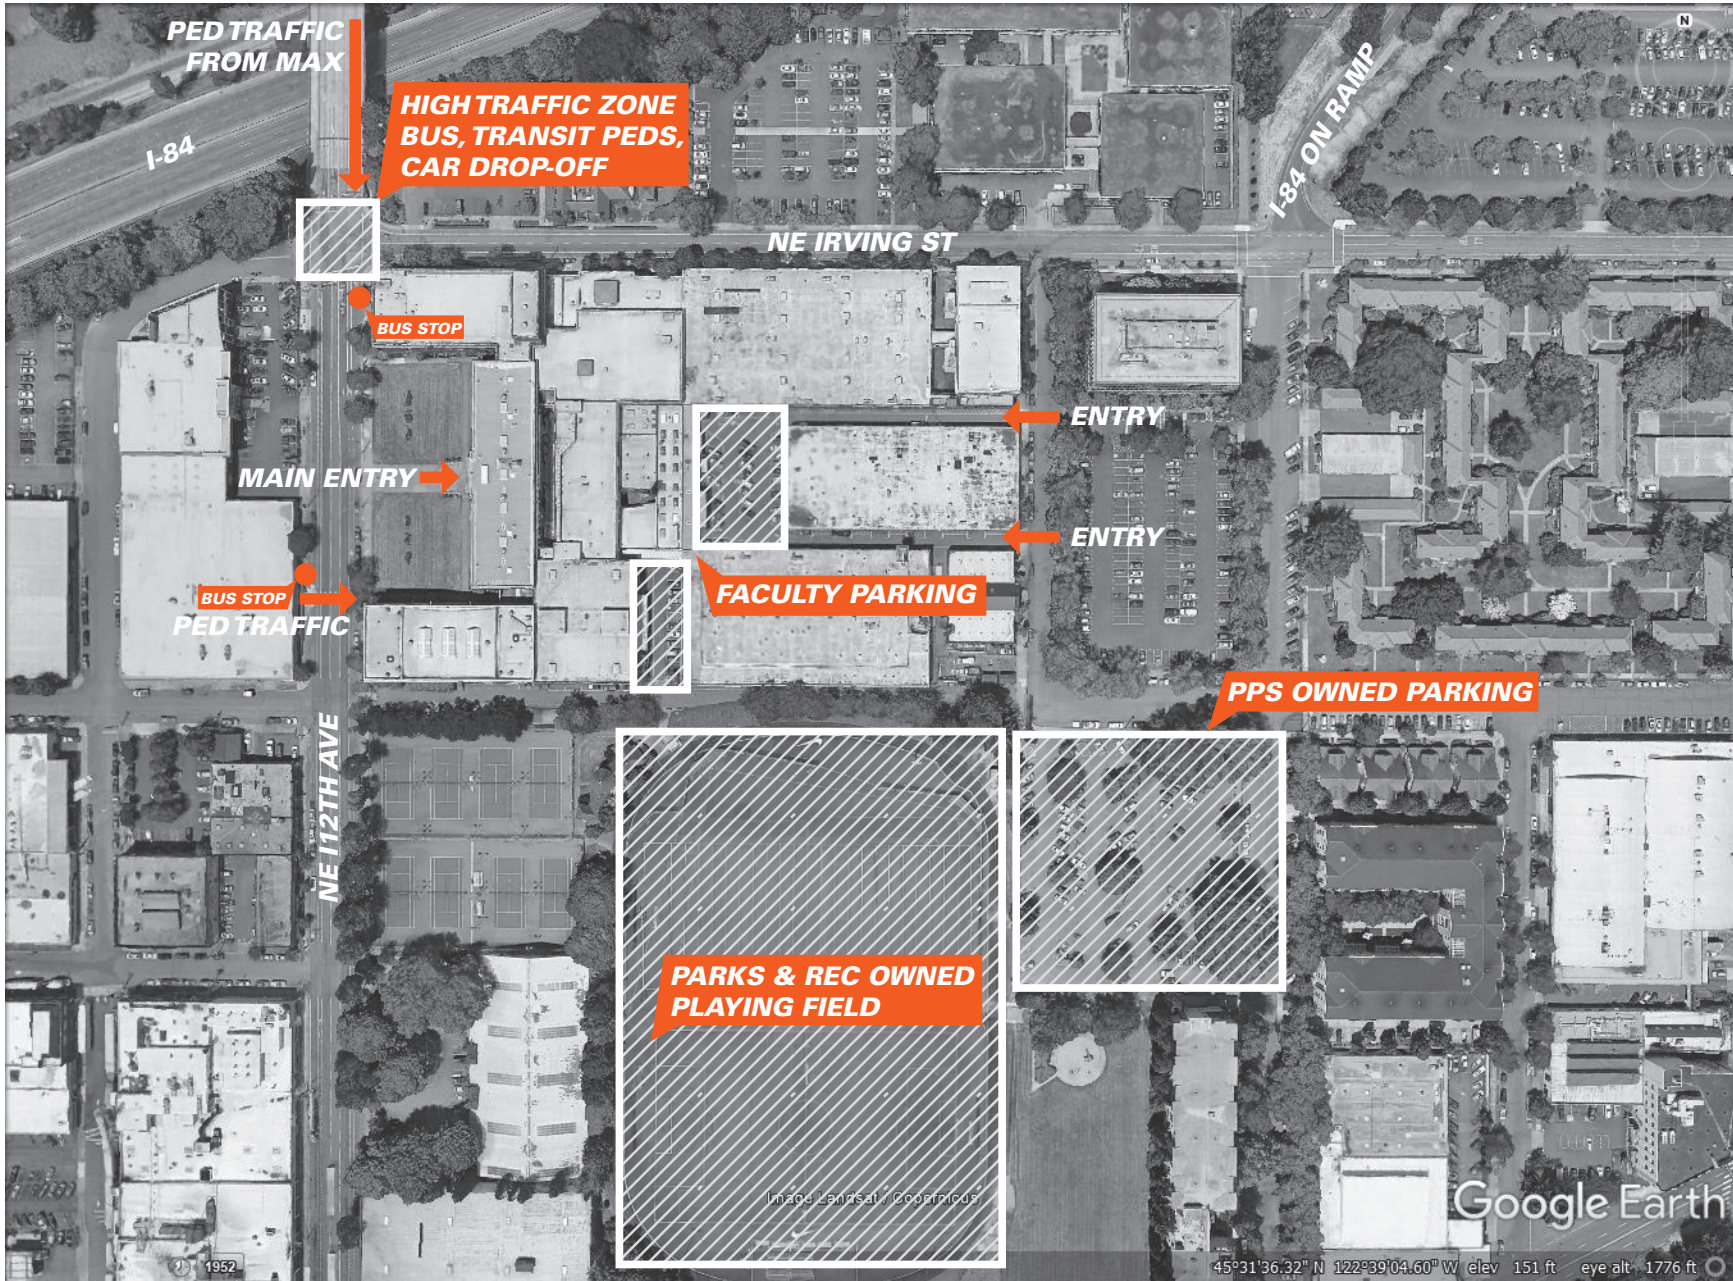

GUIDING PRINCIPLES

1. **Honor the unique history and culture of Benson Polytechnic High School.**
2. Engage with the local business, government, and post-secondary partners to create strong connections between education and industry.
3. Provide hands-on, project-based learning opportunities that are imbued with rigor and relevancy.
4. **Provide agile, flexible, and adaptable facilities that support changing educational needs.**
5. Provide learning environments that inspire creativity and collaboration among students.
6. Support a comprehensive educational experience for students.
7. Celebrate diversity and provide a sense of inclusion and belonging among students and families.
8. **Position Benson Polytechnic as a national model for STEAM and Career Technical Education (CTE).**

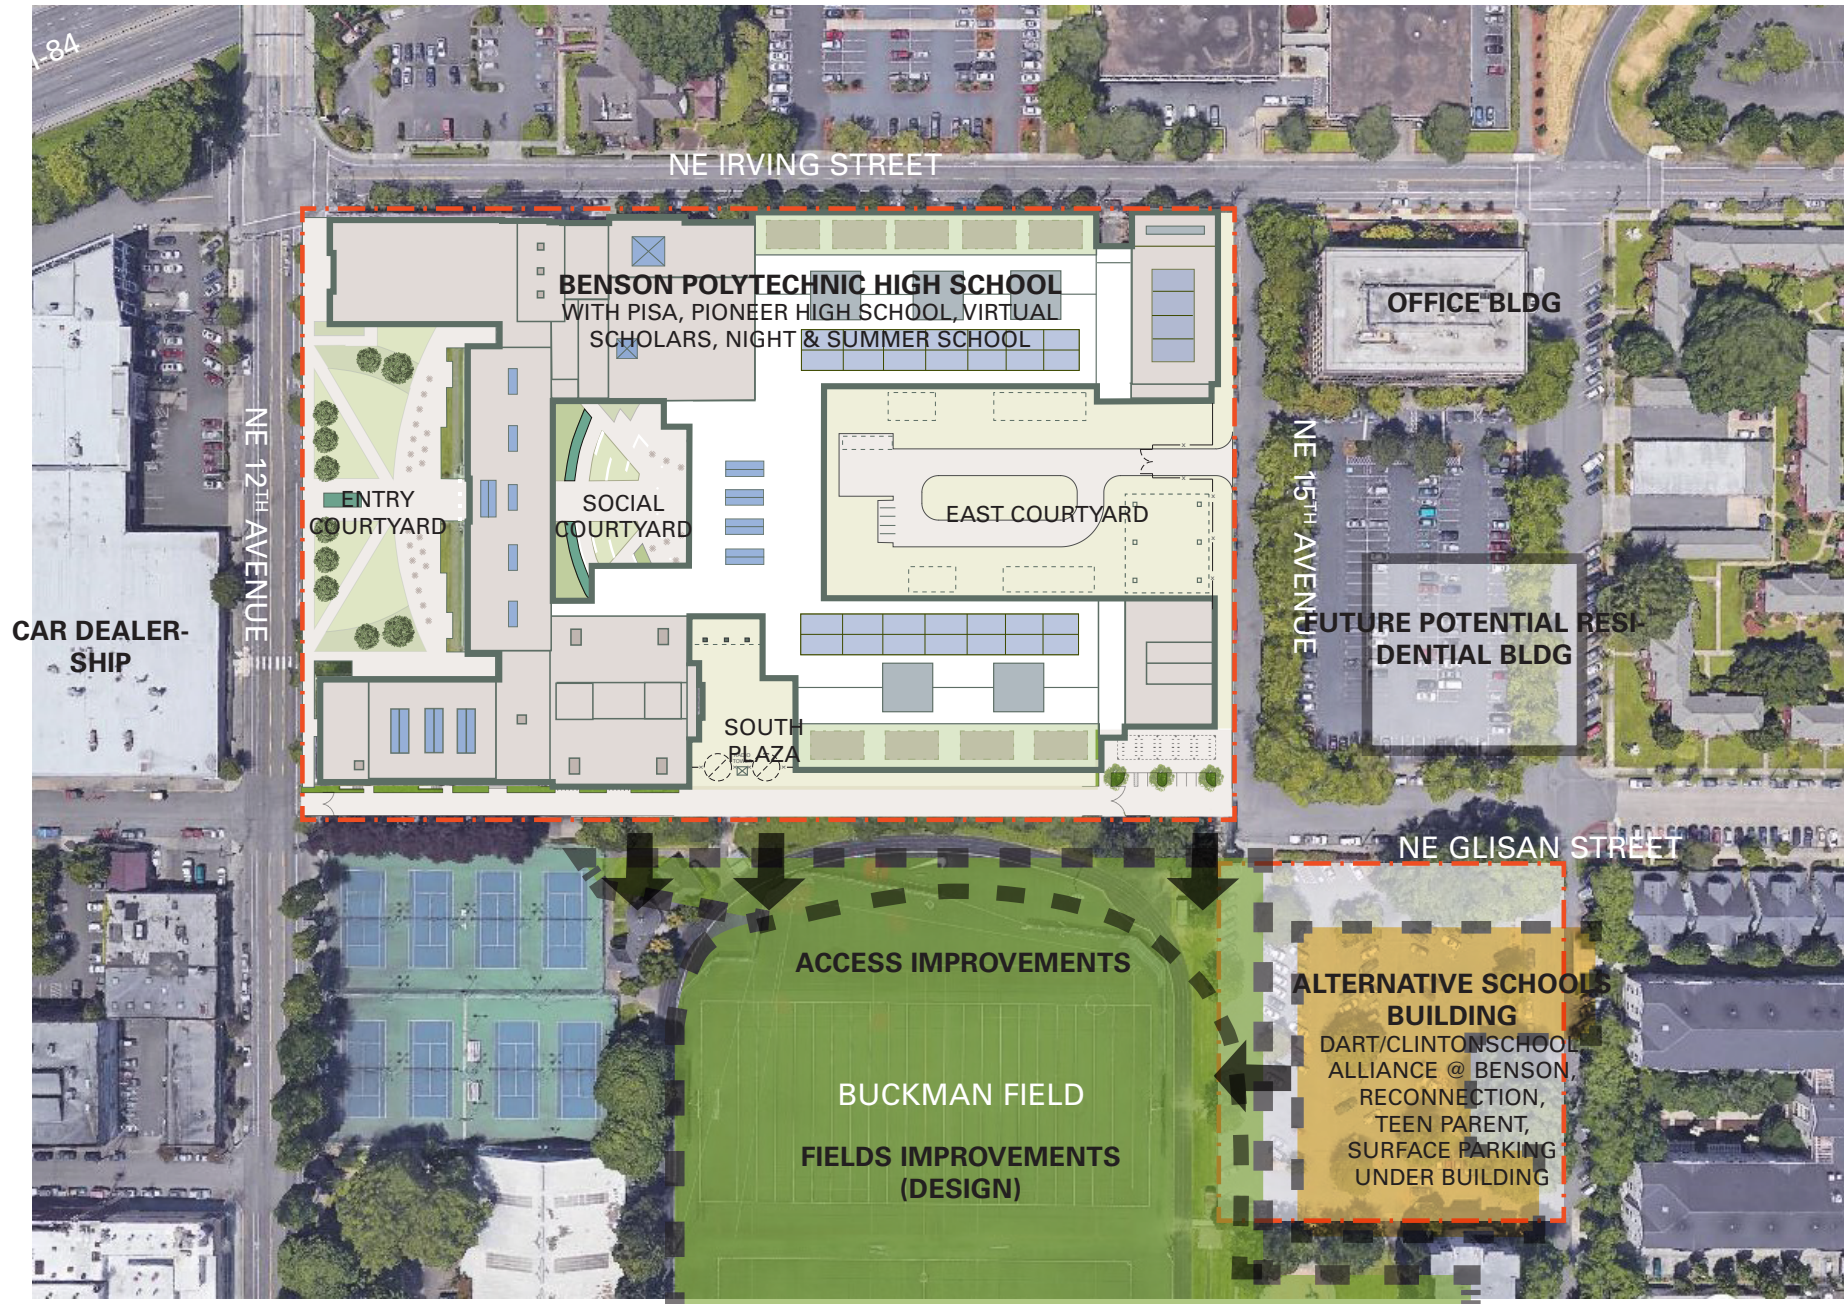

PROJECT OVERVIEW / EXISTING SITE CONDITIONS

PROJECT OVERVIEW / SITE

CURRENT SITE PLAN / BASED ON BOE RESOLUTION MARCH 19, 2019

STEERING COMMITTEE ED SPEC INPUT

Oregon Institute of Technology (OIT)

Utilize space efficiently and effectively to manage constraints and a changing industry.

UPDATED ED SPEC RESPONSE TO INPUT / PROGRAM COMPONENT SIZES

Space components have been sized appropriately in the program, using a modular format to provide consistency and regularity for efficient use of space. Components can be combined when needed for larger spaces.

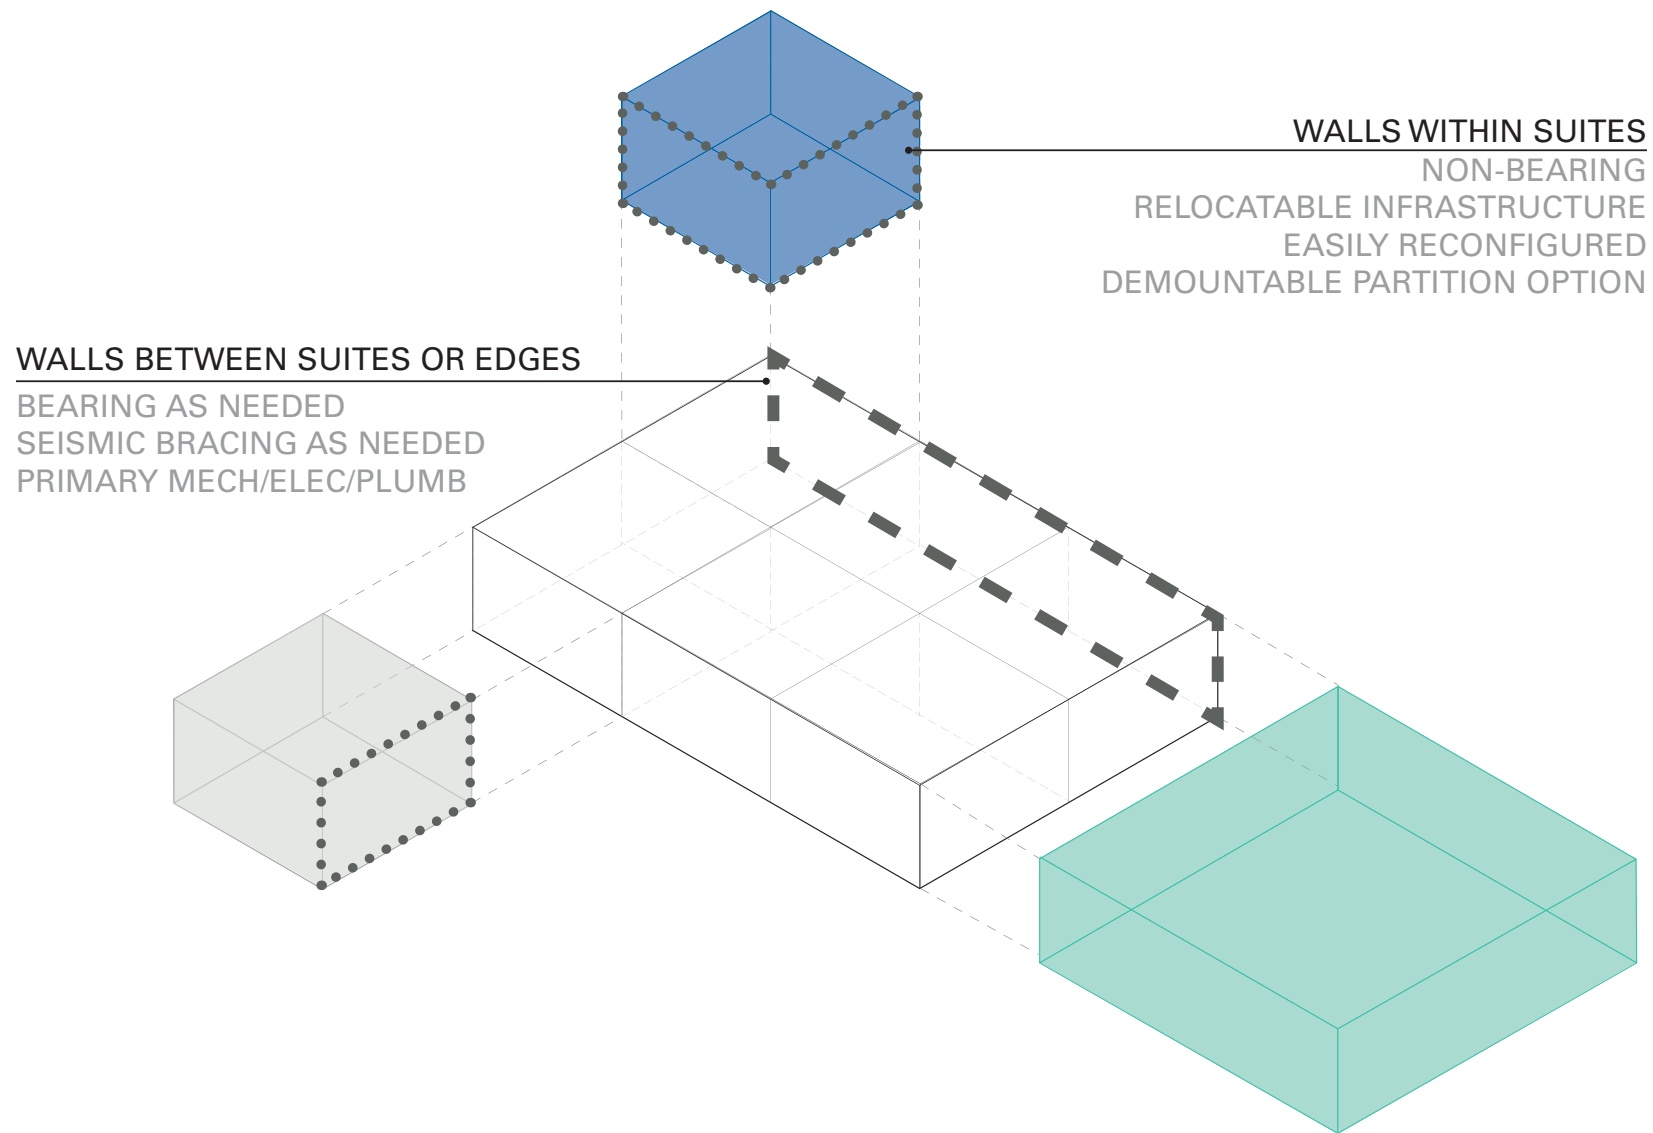

STEERING COMMITTEE ED SPEC INPUT

Mount Hood Community College

Plan for future adaptations of CTE by providing **less compartmentalization.**

UPDATED ED SPEC RESPONSE TO INPUT / SUITE DEVELOPMENT

CTE programs will have greater flexibility and adaptability by being arranged in suites that are more open, with careful thought about where bearing elements and infrastructure are placed to maintain adaptable space.

STEERING COMMITTEE ED SPEC INPUT

Clark College STEM Building

Design a **flexible and adaptable** building that can accommodate multiple scenarios.

UPDATED ED SPEC RESPONSE TO INPUT / DESIGNING FOR FLEXIBILITY

- CIRCULATION / SUPPORT
- - -> SYSTEMS INFRASTRUCTURE

The building's structural grid and central systems will be laid out in an efficient modular format that maximizes flexibility while supporting a wide range of potential arrangements and scenarios.

STEERING COMMITTEE ED SPEC INPUT

Provide **spatial adjacencies** which **enable greater collaboration** between CTE and Core Academic spaces.

UPDATED ED SPEC RESPONSE TO INPUT / KEY ADJACENCIES

- CLASSROOMS
- LABS / SHOPS
- CIRCULATION / SUPPORT

The building must be designed to support multiple scenarios, including arrangements that put Core Academics and CTE directly adjacent and across from each other.

STEERING COMMITTEE ED SPEC INPUT

Raisbeck Aviation High School

Plan for growth by providing flexible options, not necessarily increasing size of existing CTE.

UPDATED ED SPEC RESPONSE TO INPUT / SUITE DEVELOPMENT

SUITE TYPE A
3,600 SF

SUITE TYPE B
5,400 SF

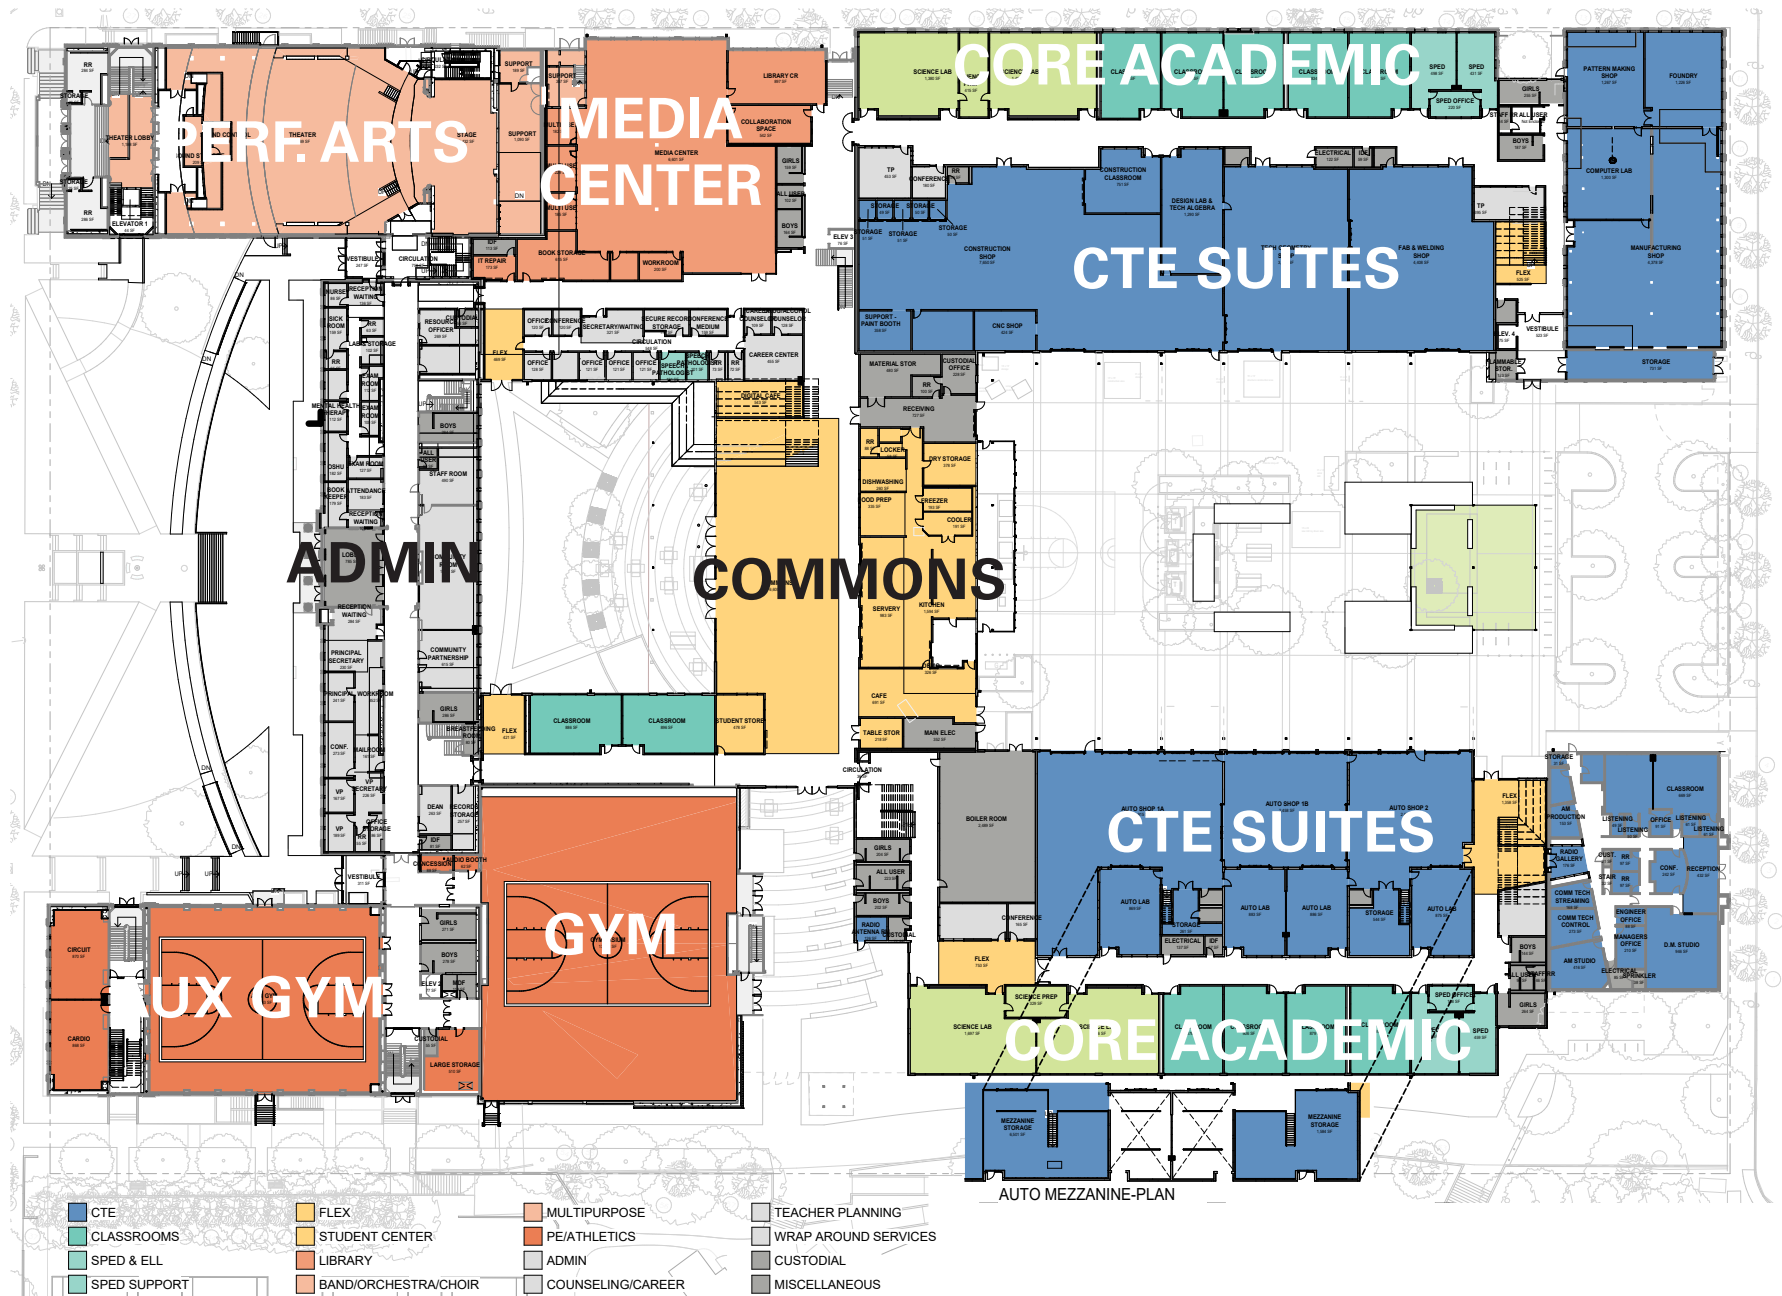

SUITE TYPE C
7,200 SF

SUITE TYPE D
14,400 SF

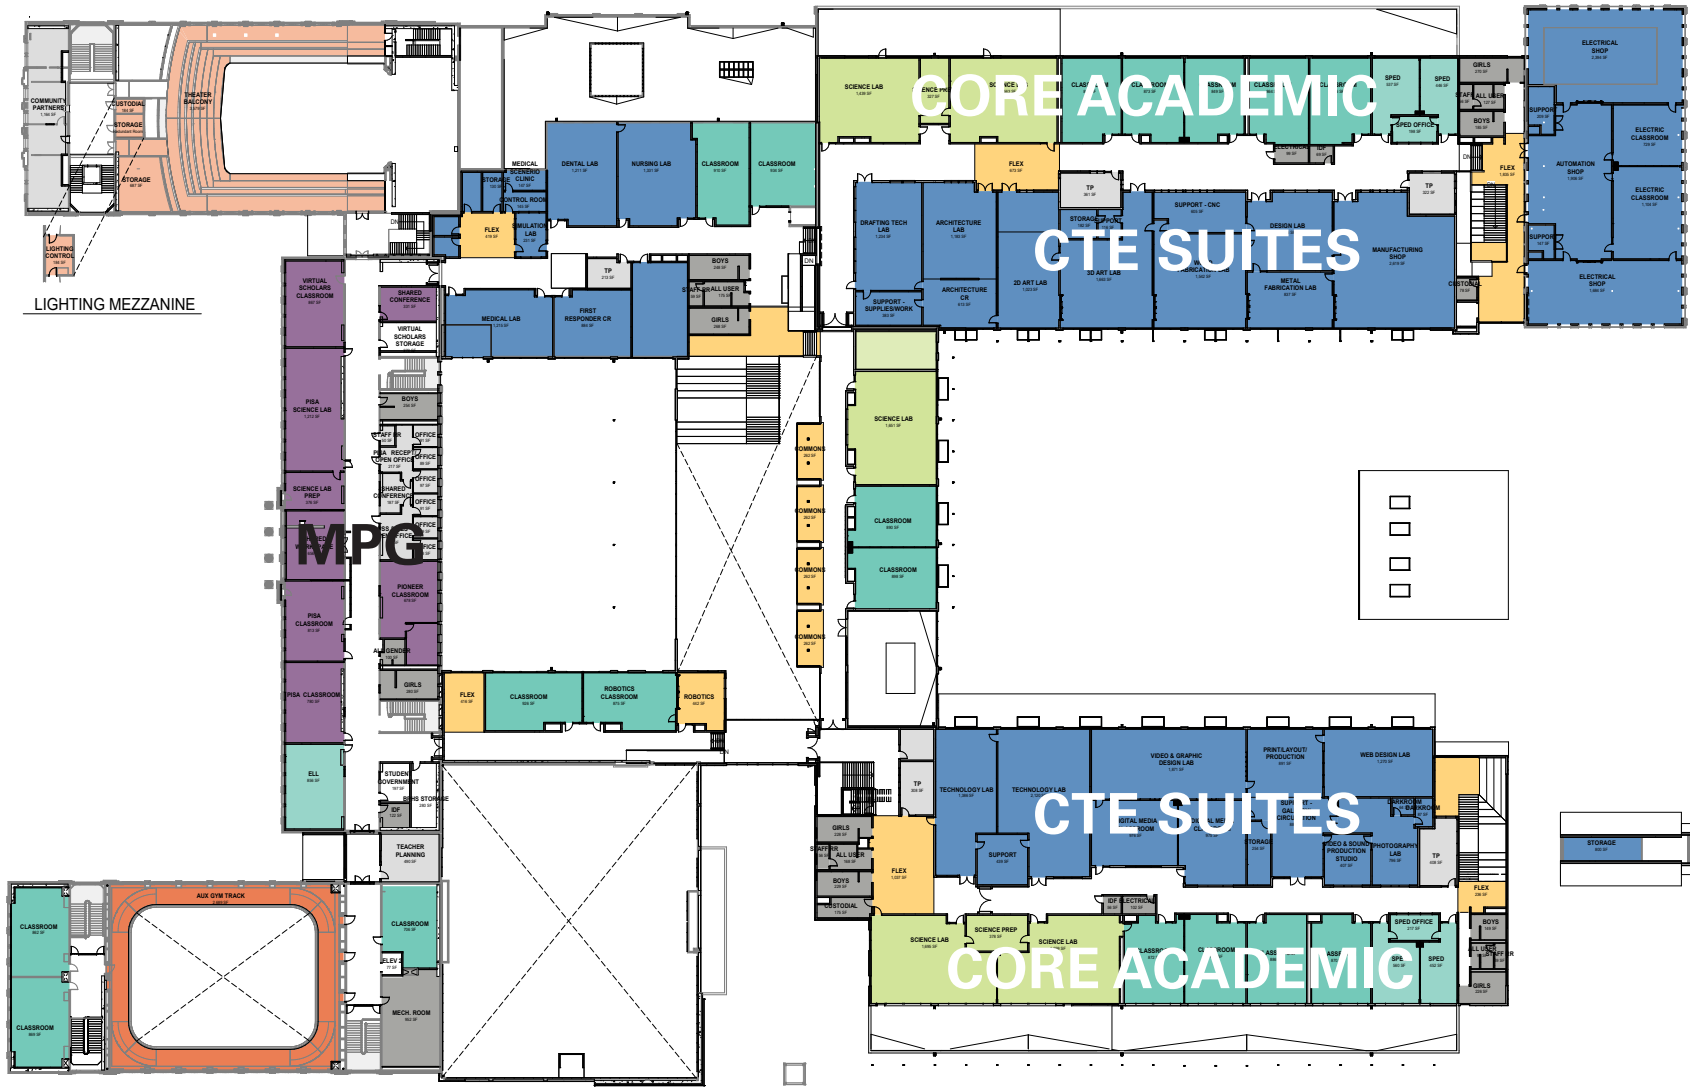

CTE programs are now organized within consistent suite types for greater parity between programs and to free up space for additional future programs that are yet to be determined. Un-programmed CTE Suite space has been reserved for potential new programs or current program growth, allowing flexibility in program development between now and opening day.

MASTER PLAN COMMITTEE FEEDBACK

- "Like glass transparency"
- "Like"

Using contemporary architecture as a connecting point between two historic buildings is a positive

"Historic vs. Contemporary is good"

MASTER PLAN COMMITTEE FEEDBACK

"Find areas to connect landscape and water with the architecture."

- "Terraces should open visually into adjacent buildings."
- "Like"

- "Open, transparent entry vs. historic building works well."
- "I like this one"

Benson Polytechnic High School is one of 3 PPS high schools being modernized or rebuilt through the May 2017 Bond. It was partially master planned as part of the 2012 School Building Improvement Bond. The goal of planning is to develop a comprehensive, equitable, integrated and visionary high school campus with authentic school and community engagement. Phased three year construction on Benson Tech is scheduled to begin in 2021.

The Master Plan for the Modernized Benson Polytechnic was approved unanimously by the School Board on Dec. 18th, 2018.

School Board supports expanded Benson modernization plan

On February 26th the PPS Board of Education voted to expand the Benson Modernization project plan to include all the Multiple Pathways to Graduation programs (MPG) that are currently housed at the Benson campus. Recently, the district undertook a series of listening sessions, analysis of the needs of each the (MPG) programs and a survey of other sites in the
