1	DO NOT Reduce the Extended Learning space: Extended Learning spaces should be considered as a need. During the day, it can be spaces for community partners to use to meet one-on-one with students. Space for that purpose is always challenging. For the after school hours, it can be used for after school programming, such as, SUN programs and other CBO programming.	1/26/2018 8:37 AM

1	This space is necessary regardless of what partners will be in the building. There will be several community, health, and culturally specific partners that will be in the building; therefore, the space should be design with flexibility and growth potential.	1/26/2018 8:37 AM
