

Jackson Middle School Traffic Circulation

Hello Jackson Middle School families and friends. We would like to thank you for taking the time to look at our traffic circulation map provided by the Safe Routes to School teams at PBOT and PPS. Our teams suggested the following modifications be made to improve traffic flow and pedestrian safety around our campus during the peak hours of arrival and dismissal.

Key Changes

- Portables will be located in the eastern half of our usual student drop-off area. Families should enter on the northern entrance of the drop-off area as usual, then continue forward to the western half of the parking lot. Students should be dropped off here and walk south to the school building.
- When exiting the drop-off driveway, a left-turn only lane and right-turn only lane are present to go onto SW 35th Av.
- Families are encouraged to use SW 40th Av behind the school as a Park & Walk location where students can be dropped off and utilize the pedestrian walkways to access the school. This decreases traffic at the school and allows you to skip the drop-off line!

Vehicular Traffic

- Suggested vehicular traffic flow is depicted using **purple arrows** on your map.
- Do not drive on or park in the school bus loading zone marked in **yellow stripes** on your map.
- Avoid stopping in the road or attempting to make U-turns.

Thank you,

-Safe Routes to Schools Team
