INTRODUCTION

Executive Summary

This report is a profile of current and historical enrollments for Portland Public Schools. Included herein are various summaries of these data, *e.g.*, by building and region level. In recent years enrollment counts are compiled on or about the first of October. An enrolled student is defined as a student who attends one or more schools or programs within the District. Regardless of the number of schools or programs attended, each student is counted only once; the counts are unduplicated.

Following are brief highlights of the report.

- Overall enrollment is 56,583, a drop of 1,439 students from the previous year.
- Over one-third of this drop occurred in Special Education and was due to the realignment of regional contract programs. This drop was expected by Special Education staff.
- High school enrollment remains essentially unchanged. Middle school and elementary school enrollments were reduced by 2.3 and 2.2 percent, respectively. The elementary school reduction seems largely a reduced enrollment in kindergarten programs.
- Enrollment in community-based alternative programs is 5.6 percent lower than last year. Dropout prevention/retrieval and specialized needs students are enrolled in these programs.
- If enrollments are compared to the 1995-96 data, after the regional program realignment is taken into account, the count would be reduced by only 135 students. The sharp rise we experienced last year may well have been a demographic anomaly.

On the next page is a table of the District enrollment summary for the last two years.

¹ October 1997 student counts reflect 687 Special Education students whose programs were transferred to Northwest Regional ESD. Most PPS students in Special Education (5,788) are reported above in "PPS Schools and Programs."

Explanations and Definitions of Computed Data

The Stability Index and Late Enrollee Ratio are indicators of student mobility in the District within a given instructional year. Used in conjunction with enrollment counts, these statistics provide a broader picture of the District's student population. For example, in schools with high late enrollee ratios or low stability indices, enrollment counts during the school year may vary considerably from the October 1 counts.

Stability Index

This is the percentage of students in a given school year enrolled at the same school October through June compared to October 1 enrollment. The average stability index for the District in 1996-97 was 72.7% (this includes many, but not all, of the District's alternative programs); for elementary schools 79.0%; for middle schools 78.3%; and high schools 70.6%. The formula used is A / B , where:

- A -- number of students enrolled in the same school October through June
- B -- the number of students enrolled **by** October 1

Late Enrollee Ratio

This is the percentage of students in a given school year who enrolled **after** October 1 compared to those who enrolled **by** October 1. The average late enrollee ratio for the District in 1996-97 was 17.7%; for elementary schools 15.2%; for middle schools 14.7%; and high schools 12.7%. (Again, the District late enrollee ratio reported above includes many alternative schools and programs, in addition to the regular elementary, middle and high schools and programs.) The formula is A / B , where:

- A -- the number of students enrolled **after** October 1
- B -- the number of students enrolled **by** October 1
